Hi, Deb.

I just took a look at our webpage for sediment sampling results.
<http://www2.epa.gov/goldkingmine/gold-king-mine-data-august-14-2015>. The text on that page makes no sense to me, particularly this sentence – “However, comparison to risk-based screening values found these exceedances to below risk screening levels.” Is that what HQ wanted us to say? Can you explain, or can we make it a little more understandable? I know you are having your own problems with the vetting process, so ignore this request if you have already done battle over it.

Thanks!

Cynthia Peterson
